## Mr. Sandeep Jain
### Founder & CEO – GeeksforGeeks

He started this Journey with just one thought- every geek should have access to a never ending range of academic resources and with a lot of hardwork and determination, **GeeksforGeeks** was born.

Through this platform, he has successfully enriched the minds of students with knowledge which has led to a boost in their careers. But most importantly, GeeksforGeeks will always help students stay in touch with their Geeky side!

" I understand that many students who come to us are either fans of the sciences or have been pushed into this field by their parents.

And I just want you to know that no matter where life takes you, we at GeeksforGeeks hope to have made this journey easier for  you. "
Looking to be a programmer for a top company or wishing to top the charts of leading coding competitions, you've come to the right place! This live course will improve your problem-solving skills so you can write reliable and optimal codes. You will be mentored by programming experts and they will give you tips and tricks on which competitions to participate in and how to succeed in them! You can attend this class from any geographical location and you will have access to the recorded sessions too. As it will be interactive, you can ask your doubts to the instructor with ease. CP Live Classes will be scheduled for Weekends- Saturday & Sunday. **An additional 1-hour doubt session scheduled on a weekday!**

👁 **VIEW DETAILED SYLLABUS**

Prerequisites for the Course:
• Knowledge of any programming language

# COURSE BENEFITS

Live Interaction with the Mentor

Top Coding Questions

Premium Lecture Videos

24X7 Doubt Assistance

Contest & Quizzes

Internship Opportunity at GFG

Complimentary Access to DSA Content

Course Completion Certificate

Limited Batch Strength

# WHERE OUR ALUMNI WORK

# Success Stories

## Abhishek Tripathi

**Associate Software EngineerAnalyst at**

**KLA+**
Keep Looking Ahead

The Competitive Programming-Live course taught me how to handle the latest type of questions asked in the interviews, approach to a problem, and which data structure concept should be used in a particular type of situation. My journey of learning at GeeksforGeeks has been absolutely seamless and wonderous throughout and benefitted to grab a job offer at KLA Tencor as an Associate Software Engineer.

## Hansika

**Poroduct Intern at**

**Adobe**

GFG has been my one-stop destination during my preparation, from DSA to all the computer science fundamental courses like Operating systems, OOPs, etc. Because of this course, I could crack an internship offer of 1 lakh/month at Adobe. I would like to thank my mentor and GFG team for teaching this subject right from the basic to the high level & furnished us with knowledge of competitive coding.

# Success Stories

## Nitish Kumar

**Associate Solution Leader at**

**Brane**

It was my fortune to get enrolled in the Competitive programming course of GfG. I was a complete beginner but after joining this course, I became proficient in programming within 2-3 months. The course mentor would always explain each doubt of every student during the live classes. DSA self-paced course was also given for free which provided me with an in-depth knowledge of almost every standard questions asked on the DSA topics.

## Vishal Talreja

**Application Engineer at**

**Google**

The Competitive Programming-Live course is pretty thorough and lucid. Even if you miss attending any of the classes, the recording can be seen later. Special thanks to the trainer, 'Striver', for clearing all the concepts and queries at the earliest.

## Chandra Kant

**Internship at**

**ORACLE**

I would like to thank "GeeksForGeeks" as the Competitive Programming course that they provided was very helpful for me for getting an internship at Oracle. I would also like to thank mentor who taught this course. They treated us like friends and always cleared my doubt whenever I asked them.

# REVIEWS

## Utkarsh Pandey
★★★★★

Anyone, who wants to ace in coding, should try this course. It's worth every penny. I would definitely recommend this course to my friends & would encourage them to join the same.

## Kishore Kunal
★★★★★

The course was perfectly designed and laid out. Live lectures were very comprehensive, which made it easy for us to follow.

## Nagendra Addepalli
★★★★★

The course is very good, especially the mentor, I have learnt many things through his teachings. GeeksforGeeks is a great platform for learning. I am 100% satisfied.

## Mansi Nauriyal
★★★★★

From course content to the mentor, everything went well for me. Striver is just amazing and is very helpful when it comes to clearing our doubts or teaching. I have no complaints at all.

# QUESTION & ANSWER

What if I miss out on any Live-session? How will I cover up?

To help out the students in every possible way, we provide the recordings of the Live lectures that are conducted. If a student misses out on any lecture, he/she can find the recordings and can go through them. In case of any further queries, they can be resolved with the help of the mentor. The recordings are uploaded within 48 hours of the class and are available to students for a duration of 6 months post the completion of the course.

In which semester of my B.Tech should I start Competitive Programming?

There is no perfect time to enroll in the course. In an ideal case, a student should enroll in this course when he/she has learnt the basics of any programming language preferably C++ & Java. The course is inclusive of pre-recorded content of Data Structures & Algorithms which will help the student to make their foundation strong.

With the help of the live lectures and the pre-recorded content, the student will be able to ace any coding competition or placement.

# QUESTION & ANSWER

**Is this course targeting only the coding competition?**

This course will not only improve your problem-solving skills such that you can top the charts of coding competitions like ICPC, Kickstart, Leetcode, and Hackathons but also help you clear the coding rounds of your campus placements.

**How can this course help me in targeting placements?**

This Live course will be covering all the important theoretical concepts of DSA & their practical implementation. It will also be covering the most important topics/questions that are generally asked in the coding rounds of the placement which will not only help the students to work on their problem-solving skills but also to write a reliable & optimized code.

**How does Doubt Support work?**

There are 3 ways in which student can get their doubts resolved.

1. This is a Live course, you can directly interact with the mentor during the class and get your doubts resolved.

2. To help our students in every manner, there will be an extra doubt session once a week of 1 hour.

3. There is a discussion forum integrated on the dashboard under each video & with problems. You can simply comment & ask your doubts there. Almost all doubts are instantly resolved by course mentors/TA's. Also, there is a separate discussion forum available where you can simply comment for any other doubt or course-related query.

Checklist to top the charts of any Coding Competiton!

- ☑ Any programming language
- ☑ Platform to practice (HackerRank, CodeChef)
- ☑ Strong Data Structures
- ☑ Very strong Algorithms
- ☑ A good amount of Practice!
